

2022

EXPRESS VAN PASSENGER

Shown with equipment from independent suppliers not covered by the GM New Vehicle Limited Warranty. GM is not responsible for the safety or quality of independent supplier alterations.

About This Publication

This catalog is not updated during the model year and should not be used for ordering purposes. It is intended as a source of basic information. All illustrations and specifications in this literature are based on the latest product information available at the time of publication. General Motors reserves the right to make changes at any time without notice. For further details, consult your local dealer.

Care must be taken during customer installation of equipment and wiring to ensure that all holes drilled in the body are corrosion protected, properly sealed and that vehicle wiring harnesses, piping or other components have not been displaced or damaged. Aftermarket equipment installers must be mindful of applicable Federal Motor Vehicle Safety Standards. This information can be obtained directly from the National Highway Traffic Safety Administration. Adding non-dealer accessories or making modifications to the vehicle can affect vehicle performance, aerodynamics, and overall top speed. Please return all police vehicles to factory condition and settings upon decommissioning to prevent civilians from using these new 2022 calibrations, lighting and other features intended only for police and emergency customers. Wiring connection or splice changes are to be removed before the vehicle is returned to civilian use.

These vehicles are equipped with an airbag system. The airbag system in your police vehicle includes frontal driver and front outboard passenger airbags, front seat back side impact airbags and roof rail mounted head-curtain airbags. Customer installed equipment such as security barriers behind the front seats should not be mounted so that the barrier ends are within the side airbag deployment zones. The sensors and other components for the airbag system must not be relocated to accommodate the installation of customer furnished equipment; please refer to the service manual for sensor and other component locations. For information concerning instrument panel top pad mounted equipment and airbag system deployment zones, see the airbag information section in this catalog and the vehicle owners manual.

A note about vehicle alterations by independent suppliers: This catalog shows pictures of vehicles that have been altered or upfitted with equipment or components supplied to Chevrolet or its dealers by independent suppliers. GM is not responsible for the safety or quality of design features, materials or workmanship of any alterations by third parties.

OPTIONAL ELECTRICAL FEATURES

9L7 WIRING JUNCTION BLOCK EQUIPMENT ACCESSORY - Includes 2-30 amp circuits. Requires (KG4) alternator 150 amp or (KW5) alternator 220 amp and dual batteries (770 cca primary and 770 cca isolated). Not available with (RGI) front instrument panel routing grommet or (LWN) 2.8L Duramax Turbo-Diesel engine.

OPTIONAL MECHANICAL FEATURES

KW5 ALTERNATOR - 220 amps

K08 AUXILIARY HEAT GENERATOR - Fuel-operated. Supplemental heat source to cooling system to improve heat output for HVAC and (C36) rear auxiliary heater is selected. Included and only available with (V10) Cold Climate Package and (LWN) 2.8L Duramax Turbo-Diesel engine

TP3 BATTERY, 770 COLD-CRANKING AMPS PRIMARY - Isolated 2nd heavy-duty 770 cold-cranking amps, allows 2nd battery to be used when the vehicle is not running without affecting ability to start the vehicle. Not available with (LWN) 2.8L Duramax Turbo-Diesel engine. Not available with (LWN) 2.8L Duramax Turbo-Diesel engine

UA1 BATTERY, HEAVY-DUTY 770 COLD-CRANKING AMPS - Maintenance free with rundown protection and retained accessory power. Not available with (TP3) dual batteries (770 cca primary and 770 cca isolated) or (LWN) 2.8L Duramax Turbo-Diesel engine

V10 COLD CLIMATE PACKAGE - Includes (K05) engine block heater. Includes (K08) auxiliary heat generator when ordered with (LWN) 2.8L Duramax Turbo Diesel engine

G80 DIFFERENTIAL - Heavy-duty locking rear

L8T ENGINE - 6.6L V8 with Direct Injection and Variable Valve Timing, gasoline, (401 hp [299 kW] @ 5200 rpm, 464 lb-ft of torque [629 N-m] @ 4000 rpm) For CG23406 1LS, included with (WP9) Communications Package, (WPD) Safety Package or (ZL3) Enhanced Convenience Package. For all 1LS models, includes external engine oil cooler. Requires (MYD) 6-speed heavy-duty automatic transmission. Reference the Engine/Axle page for availability.

LWN ENGINE, 2.8L DURAMAX - Turbo-Diesel, DI, 4-cylinder (181 hp [135.0 kW] @ 3400 rpm, 369 lb-ft of torque [498.2 N-m] @ 2000 rpm), includes exhaust brake that activates tow-haul mode. Requires (KG4) 150 amp alternator or (KW5) 220 amp alternator

K05 ENGINE BLOCK HEATER - Included with (V10) Cold Climate Package or requires (LWN) 2.8L Duramax Turbo Diesel engine

R9Y FLEET FREE MAINTENANCE CREDIT - This option code provides a credit in lieu of the free oil changes, tire rotations and inspections for one maintenance service during 1st year of ownership. The invoice will detail the applicable credit. The customer will be responsible for all oil change, tire rotations and inspections costs for this vehicle. Requires one of the following Fleet or Government order types: FBC, FEF, FLS, FNR, FRC or FGO. Not available with FDR order types

8E1 FUEL, ADDITIONAL 3-GALLONS - 3 gallons of fuel in addition to normal assembly plant fill

9C2 GOVERNOR - Electronic speed sensor set to 65 MPH. Electronic software to facilitate 65-MPH maximum road speed Requires a Fleet order. Only available on 'LS' CG23406 Model

UF3 HIGH IDLE SWITCH - Requires (ZQ3) Convenience Package. Not available with (LV1) 4.3L V6 SIDI engine

E48 RADIATOR GRILLE COVER - Requires (LWN) 2.8L Duramax Turbo Diesel engine. Ships loose in cab. Required on orders with "Ship To" locations within the following states: Alaska, Colorado, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New York, North Dakota, South Dakota, Vermont, Wisconsin and Wyoming

Z82 TRAILERING EQUIPMENT - Heavy-duty, includes trailering hitch platform and dual 4-pin/7-pin sealed connector. Included with (ZL3) Enhanced Convenience Package. Includes (UY7) trailer wiring harness.

UY7 TRAILERING WIRING PROVISIONS - Trailering wire harness only. Included with (Z82) Heavy-duty trailering equipment

MYD TRANSMISSION 6-SPEED AUTOMATIC - Heavy-duty, electronically controlled with overdrive and tow/haul mode. Includes Cruise Grade Braking, Powertrain Grade Braking, and Tap-Up/Tap-Down Driver Shift Control. Requires (L8T) 6.6 L V8 gasoline engine.

MQD TRANSMISSION 8-SPEED AUTOMATIC - Included with diesel specific torque converter that includes centrifugal pendulum-type absorber, electronically controlled with overdrive and tow/haul mode. Includes Cruise Grade Braking and Powertrain Grade Braking. Included and only available with (LWN) 2.8L Duramax Turbo-Diesel engine

The wiring system is designed to operate with maximum performance and reliability. Adding electrical accessories to the vehicle for which it was not designed, would cause abnormalities in the electrical system.
The electrical system was designed to handle one additional stop/turn light bulb per tail light circuit (one added stop/turn light bulb to the right and left side). It is not recommended to add more than one bulb per circuit as it will result in damage to the electrical system (without optional trailer Towing Wiring). It is highly recommended to order the van with the optional (UY7) trailering wire harness only, trailering provisions for towing.

GCWR For Engine/Rear Axle Ratio Combination

EMISSIONS - MUST BE SPECIFIED

| | |
|------------|--|
| FE9 | Emissions , Federal requirements |
| YF5 | Emissions , California state requirements |
| NE1 | Emissions , Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont and Washington state requirements |
| NB8 | Emissions override , California (allows a dealer in states that require California emissions - California, Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island or Washington - to order Federal emissions for a vehicle that will be registered in a state that has Federal emission requirements). Do not use for vehicles that will be registered in California, Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island or Washington. Requires (FE9) Federal emissions requirements. Not available in Maine or Vermont. |
| NB9 | Emissions override , state-specific (for dealers ordering vehicles in (YF5) or (NE1) emission states - California, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont and Washington) Allows a California dealer (YF5 emissions) to order (NE1) emissions with (NB9) emissions override code for registration in (NE1) states; or, a Connecticut, Delaware, Maine, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont and Washington dealer (NE1 emissions) to order (YF5) emissions with (NB9) emissions override code for registration in California. |
| NC7 | Emissions override , Federal (for vehicles ordered by dealers in Federal emission states with (YF5) or (NE1) emissions - Not required for vehicles being shipped to California, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont or Washington) Requires (YF5) California state emissions requirements or (NE1) Connecticut, Delaware, Maine, Massachusetts, New York, Pennsylvania, Rhode Island or Vermont state emission requirements. |

1. Before you buy a vehicle or use it for trailering, carefully review the Trailering section of the Owner's Manual. The weight of passengers, cargo and options or accessories may reduce the amount you can tow

| | | | |
|--------------------------------------|-----------|-----------|-----------|
| GVWR ¹ , lbs./kg | 8600/3901 | 9600/4355 | 9600/4355 |
| Payload ² , lbs./kg | 2200/998 | 3200/1452 | 3170/1438 |
| Base curb weight, lbs./kg | 6345/2878 | 6377/2893 | 6675/3028 |
| Seating capacity (front/2nd/3rd/4th) | 2/3/3/4 | 2/3/3/4 | 2/3/3/4 |

NOTE: See Vehicle Load Limits in your Owner's Manual for loading information.

1. Gross Vehicle Weight Rating (GVWR). When properly equipped, includes vehicle, passengers, cargo and equipment.
2. These maximum payload ratings are intended for comparison purposes only. Before you buy a vehicle or use it to haul people or cargo, carefully review the vehicle loading section of the Owner's Manual and check the carrying capacity of your specific vehicle on the label on the inside of the driver's door jamb.

Sitting too close to an airbag when it deploys can increase the risk of serious injury or death. Always properly wear your seat belt. See Owner's Manual for more information.

AIRBAGS FAQ

Q: Can equipment such as radar devices, video cameras, and radio trees be mounted in a specialty vehicle equipped with a right front passenger frontal airbag?

A: Yes, but care must be taken to properly mount the equipment outside of the airbag "deployment zone."

Q: What is the airbag "deployment zone"?

A: The term "deployment zone" describes the space an airbag takes up when fully inflated. Airbags need room to work properly, and anything in the "deployment zone" – such as improperly mounted equipment – can greatly affect the performance of the airbag.

Q: How can I identify the airbag "deployment zone" in my vehicle?

A: See Airbag Deployment Diagrams for more information. The diagrams provide the approximate dimensions of the "deployment zones" for your specialty vehicle. Before doing any service work, including the installation of any equipment, consult the appropriate service manual.

Q: Is it possible to shield equipment so it does not interfere with airbag deployment?

A: While shielding may protect certain equipment from being damaged or dislodged, it may also negatively affect how an airbag inflates. Therefore, we do not recommend the placement of any equipment in the deployment zone, even if shielded.

Q: Can the installation of push bumpers on the front end of the vehicle affect the deployment of the airbag?

A: It is not likely that installing push bumpers will affect deployment for the airbag as long as the vehicle structure itself is not modified. GM is not aware of any adverse defects effect on the deployment of the front airbags due to use of many aftermarket push bumpers installed on current GM police vehicles

See "Adding Equipment to the Airbag-Equipped Vehicle" in the owner manual for more information.

Customer-Installed Equipment

Before installing equipment, read the following.

Airbags inflate with great force, faster than the blink of an eye. No objects, such as shotguns, should be placed over or near the airbag covers. Equipment mounted too close to an inflating airbag could prevent the airbag from operating properly to protect the occupants or could be forced into an occupant or break and become a dangerous projectile, causing severe injury or even death. To help prevent injury and to allow the airbag to perform as it was designed, do not mount equipment inside the airbag deployment zones.

Do not attach anything to the steering wheel hub or mount any equipment within the deployment zone for the driver airbag.

Do not mount equipment on the passenger side of the instrument panel top pad deployment zone. Equipment should not be mounted on or around the passenger airbag opening because of a deploying airbag. To allow the airbag to perform as it was designed, do not mount equipment inside the airbag deployment zone.

Do not mount a security barrier such that the ends of the barrier or brackets are within the roof-rail airbag deployment zones.

Avoid installing wiring for roof-rail emergency lighting or radio antennas that may restrict the proper deployment of the roof-rail airbags.

GM approved service procedures must be followed to remove and reinstall the instrument panel to the pad to ensure proper airbag deployment.

The police vehicle has a rollover sensor mounted on the centerline of the vehicle between the driver and front outboard passenger positions. If the vehicle has individual front seats, the rollover sensor will be exposed. Do not mount equipment within 25 mm (1 in) of the rollover sensor. This may affect the performance of multiple restraint systems.

ELECTRONIC STABILITY CONTROL SYSTEMS (STABILITRAK)

Stabilitrak systems help drivers maintain control of their vehicles, especially during emergency lane changes or avoidance maneuvers. Stabilitrak uses various sensors, such as steering wheel angle, wheel speed, yaw velocity, etc., to detect any difference between the path requested by the steering wheel position and vehicle's actual path. When appropriate, the system selectively controls brakes, engine power, and even suspension settings to enhance control of the vehicle's direction and help keep it on course.

See your owner's manual for additional information about the operation of Stabilitrak.

Q. How do I use Stabilitrak?

A. Stabilitrak operates independently of the driver.

You should continue to drive your Stabilitrak equipped vehicle with caution and care. GM's Stabilitrak system, Stabilitrak is designed to be as seamless as possible in operation, and part of the overall vehicle response.

Q. How does Stabilitrak work?

A. Stabilitrak has the ability to apply control forces to the vehicle independent of the driver. Stabilitrak uses sensors to continuously compare the path indicated by the steering wheel position to the vehicle's actual path. If a discrepancy is detected, Stabilitrak selectively controls vehicle brakes and engine torque to create a yaw moment that helps restore the vehicle's actual path to the path indicated by the steering wheel position. Stabilitrak has the ability to help correct both understeer (where the vehicle is not turning as much as the steering wheel position indicates) and oversteer (where the vehicle is turning more than the steering wheel position indicates).

Q. Will a tire change affect Stabilitrak?

A. Use of tires other than original equipment may affect Stabilitrak performance. Stabilitrak is designed to make the best use of available traction. The performance characteristics of the original equipment tires are part of the overall system effectiveness. When you replace tires check the recommendations in your owner's manual. On GM vehicles, the original equipment tires have a "TPC" (Tire Performance Criteria) code on the sidewall. Replacing the tires with the same "TPC" code will help assure proper Stabilitrak performance.

DRIVER OPERATED TRACTION CONTROL BUTTON

An advanced computer controlled stability enhancement system assists the driver with directional control of the vehicle in difficult driving conditions. Each time the vehicle is started, the Stabilitrak system is fully on. Stabilitrak can be controlled by a Traction Control Button. The condition system is displayed by a Stabilitrak indicator light and Driver Information

Center (DIC) Message. Push once to disable Traction Control. Push and hold to disable both Traction Control and Stabilitrak. In this condition, Stabilitrak will automatically turn ON when the vehicle speed exceeds 35 mph (56km/hr) while the Traction Control remains OFF. Push again to enable Traction Control and Stabilitrak.

MAINTENANCE / LIMITED WARRANTY

| | |
|--|--|
| INCLUDED MAINTENANCE | One visit within first year of vehicle delivery ¹ |
| BUMPER-TO-BUMPER LIMITED WARRANTY | 3 years/36,000 miles ² . Bumper-to-Bumper Limited Warranty with no deductible |
| TRANSFERABLE POWERTRAIN LIMITED WARRANTY | Qualified Fleet Customers: 5 years/100,000 miles ³ |
| TIRES⁴ | 3 years/36,000 miles ² ; coverage prorated after first 12,000 miles |
| ROADSIDE ASSISTANCE AND COURTESY TRANSPORTATION | Qualified Fleet Customers: 5 years/100,000 miles ³ |
| RUST-THROUGH | 6 years/100,000 miles ² |
| CORROSION | 3 years/36,000 miles ² |
| WHEEL ALIGNMENT AND BALANCE | Up to 7,500 miles ⁶ |

1. Includes first required maintenance visit as stated in vehicle maintenance schedule. Maintenance visit consists of oil change, tire rotation and Multi-Point Vehicle Inspection. Does not include air filters. See participating dealer for other restrictions and complete details. Excludes vehicles ordered with fleet delete option RY9. **2.** Whichever comes first. See dealer for limited warranty details. **3.** Whichever comes first. A Qualified Fleet User is defined as a company that has purchased and registered or leased five (5) or more new cars/or trucks solely for use in its operation during the current or preceding calendar year, model year, preceding twelve (12) month period, or that owns or leases fifteen (15) or more cars and trucks. Excludes rental customers. See dealer for details. **4.** Tires also covered under the Bumper-to-Bumper limited warranty but are prorated based upon mileage. See dealer for limited warranty details. **5.** If the vehicle has a warrantable failure, see your Owner's Manual for full details on the Courtesy Transportation program. **6.** Customer maintenance item after 7,500 miles.

GM reserves the right to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models, and availability. Specifications, dimensions, measurements, ratings, and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximates based upon design and engineering drawings and prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your GM dealer for complete details. Some of the equipment shown or described throughout this publication may be available at extra cost, and/or is supplied by an independent supplier.
