## About This Publication

This catalog is not updated during the model year and should not be used for ordering purposes. It is intended as a source of basic information. All illustrations and specifications in this literature are based on the latest product information available at the time of publication. General Motors reserves the right to make changes at any time without notice. For further details, consult your local dealer.

Care must be taken during customer installation of equipment and wiring to ensure that all holes drilled in the body are corrosion protected, properly sealed and that vehicle wiring harnesses, piping or other components have not been displaced or damaged. Aftermarket equipment installers must be mindful of applicable Federal Motor Vehicle Safety Standards. This information can be obtained directly from the National Highway Traffic Safety Administration. Adding non-dealer accessories or making modifications to the vehicle can affect vehicle performance, aerodynamics, and overall top speed. Please return all vehicles to factory condition and settings upon decommissioning to prevent civilians from using these new 2025 calibrations, lighting and other features intended only for and emergency customers. Wiring connection or splice changes are to be removed before the vehicle is returned to civilian use.

These vehicles are equipped with an airbag system. The airbag system in your vehicle includes frontal driver and front outboard passenger airbags, front seat back side impact airbags and roof rail mounted head-curtain airbags. Customer installed equipment such as security barriers behind the front seats should not be mounted so that the barrier ends are within the side airbag deployment zones. The sensors and other components for the airbag system must not be relocated to accommodate the installation of customer furnished equipment; please refer to the service manual for sensor and other component locations. For information concerning instrument panel top pad mounted equipment and airbag system deployment zones, see the airbag information section in this catalog and the vehicle owners manual.

A note about vehicle alterations by independent suppliers: This catalog shows pictures of vehicles that have been altered or upfitted with equipment or components supplied to Chevrolet or its dealers by independent suppliers. GM is not responsible for the safety or quality of design features, materials or workmanship of any alterations by third parties.

<b>VEHICLE-TO-HOME</b>	All V2H-capable GM EV's can provide power to your properly equipped home in a blackout to all equipment groups. The GM Energy PowerShift Charger and GM Energy V2H Enablement Kit requires an adequately charged and properly equipped GM EV having bidirectional charging capabilities, a properly equipped home and proper grid interconnection. Some eligible 24MY EVs will require a dealership or over-the-air update to enable bidirectional charging. Weather conditions, life of the battery, vehicle variation and usage, and other external factors may impact the duration of power supply. Power supply may be interrupted. It is not recommended that Medical Devices be powered with the GM Energy PowerShift Charger and V2H Enablement Kit.

<sup>1</sup>. Use Hitch Guidance only to help back the vehicle to a trailer hitch or, when traveling above 12 km/h (8 mph), to briefly check the status of your trailer. Do not use for any other purpose, such as making lane change decisions. Before making a lane change, always check the mirrors and glance over your shoulder. Improper use could result in serious injury to you or others.

## STANDARD SAFETY FEATURES

<b>ADAPTIVE CRUISE CONTROL<sup>1</sup></b>	Adaptive Cruise Control allows you to set a cruise control speed and automatically follow a detected vehicle ahead at a driver-selected following gap. If no vehicle is detected in your path, the feature works like regular cruise control. You can always override the feature and take control.
<b>AIRBAGS<sup>2</sup></b>	Frontal airbags for driver and front passenger; Seat-mounted side-impact airbags for driver and front outboard passenger; Head-curtain airbags for front and rear outboard seating positions; Includes front outboard Passenger Sensing System for frontal passenger airbag.
<b>BLIND ZONE STEERING ASSIST<sup>1</sup></b>	Blind Zone Steering Assist can alert you and provide a brief, firm turn of the steering wheel when a potential crash is detected with a moving vehicle in the lane you're entering.
<b>BUCKLE TO DRIVE<sup>2</sup></b>	Prevents vehicle from being shifted out of Park until driver seat belt is fastened; times out after 20 seconds and encourages seat belt use, can be turned on and off in Settings or Teen Driver menu.
<b>ENHANCED AUTOMATIC EMERGENCY BRAKING<sup>1</sup></b>	Enhanced Automatic Parking Assist can automatically steer, brake and shift gears to park your vehicle into a detected parallel or perpendicular parking space while you are in the driver's seat. It can also help you unpark. You must always be prepared to override the feature and take control.
<b>FOLLOWING DISTANCE INDICATOR<sup>1</sup></b>	Following Distance Indicator displays the following time in seconds between your vehicle and a detected vehicle you're following to help you maintain a safe following distance.
<b>FORWARD COLLISION ALERT<sup>1</sup></b>	Forward Collision Alert can warn you if it detects a potential collision with a detected vehicle you're following so you can take action. It can also provide a tailgating alert if you're following a vehicle much too closely.
<b>FRONT PEDESTRIAN AND BICYCLIST BRAKING<sup>1</sup></b>	At speeds between 5 and 50 mph, Front Pedestrian and Bicyclist Braking can help you avoid or reduce the severity of a collision with a pedestrian or bicyclist it detects directly in front of you. It provides alerts and can automatically provide hard emergency braking or enhance the driver's hard braking. It has limited nighttime and low visibility performance.
<b>HD SURROUND VISION CAMERA<sup>1</sup></b>	With Trailer View Camera provision. HD Surround Vision provides selectable digital camera views of the area around your vehicle to help you park and avoid vehicles and objects. You can also display a guideline to show where your vehicle is heading.
<b>INTELLIBEAM<sup>1</sup></b>	At speeds above 25 mph, IntelliBeam can automatically turn the vehicle's high beams on and off according to surrounding traffic conditions.
<b>INTERSECTION AUTOMATIC EMERGENCY BRAKING<sup>1</sup></b>	Intersection Automatic Emergency Braking can help you avoid or reduce the severity of an intersection collision with a detected cross-traffic vehicle. It provides alerts and can even automatically provide hard emergency braking or enhance the driver's hard braking.
<b>LANE KEEP ASSIST WITH LANE DEPARTURE WARNING<sup>1</sup></b>	Lane Keep Assist with Lane Departure Warning uses a brief steering wheel turn to alert you when it detects you are unintentionally drifting out of your lane lines. If needed, you may receive additional Lane Departure Warning alerts. System alerts do not occur if you're using your turn signal, or it detects you may be intentionally leaving your lane.
<b>LATCH SYSTEM<sup>2</sup></b>	Lower Anchors and Tethers for Children. For installing child restraints seats.
<b>PEDESTRIAN SAFETY SIGNAL<sup>1</sup></b>	Automated external sound generator at low speeds alerts pedestrians of vehicle presence.
<b>REAR CROSS TRAFFIC BRAKING<sup>1</sup></b>	When you're in Reverse, Rear Cross Traffic Braking alerts you and automatically provides hard emergency braking to help prevent a collision with detected vehicles crossing behind you.
<b>REAR PARK ASSIST<sup>1</sup></b>	When in Reverse, Rear Park Assist provides alerts of nearby detected vehicles and objects behind your vehicle to help you park and avoid collisions.
<b>REAR PEDESTRIAN ALERT<sup>1</sup></b>	When you're in Reverse, Rear Pedestrian Alert can alert you to detected pedestrians directly behind your vehicle. It has limited nighttime and low visibility performance.
<b>REVERSE AUTOMATIC BRAKING<sup>1</sup></b>	Reverse Automatic Braking alerts you and/or automatically provides hard emergency braking to help avoid collisions with detected vehicles and objects directly behind you when you're in Reverse.
<b>SAFETY ALERT SEAT<sup>2</sup></b>	Safety Alert Seat uses left-, right- or both-side driver seat vibration pulses to help you detect and identify the direction of potential crashes. You can also switch to beeping crash avoidance alerts."
<b>SEAT BELTS<sup>2</sup></b>	3-way for all positions. Front passenger presence detector. Rear passenger seat belt indicators.
<b>SIDE BICYCLIST ALERT<sup>1</sup></b>	Side Bicyclist Alert alerts you to a detected bicyclist that is approaching a side blind zone. Also, during a brief time after parking, the feature can alert you when a detected bicyclist is approaching so you don't open your door.
<b>SPEED LIMIT ASSIST<sup>1</sup></b>	Speed Limit Assist uses a camera to identify the posted speed limit and automatically adjusts the vehicle's maximum set speed. You can adjust the set speed relative to the system-detected speed limit. This feature works when not using cruise control.
<b>TEEN DRIVER<sup>2</sup></b>	Smartphone app, helps encourage better driving habits for teens by providing a report card through the available smartphone app. It also activates certain safety systems when a Teen Driver-designated Remote Key is used and mutes the radio until the front-seat occupants fasten their seat belts.
<b>TRAFFIC SIGN RECOGNITION<sup>1</sup></b>	Traffic Sign Recognition can display detected speed limit signs in your instrument cluster. The feature can also be set to notify you when you may be speeding or a new sign is detected.

**1.** Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings, and road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle's owner's manual for more important feature limitations and information. **2.** Always use seat belts and child restraints. Children are safer when properly secured in a rear seat in the appropriate child restraint. See the Owner's Manual for more information.

1. Adding non dealer accessories or making modifications to the vehicle can affect vehicle performance, aerodynamics, and overall top speed. 2. Work Truck Trim EPA-estimated range on a full charge Actual range may vary based on several factors, including temperature, terrain, battery age, loading, and how you use and maintain your vehicle. 3. Gross Vehicle Weight Rating (GVWR). When properly equipped, includes vehicle, passengers, cargo and equipment. 4. Maximum Gross Combined Weight Rating (GCWR). When properly equipped; includes weight of the vehicle and trailering combination, including the weight of driver, passengers, fuel, optional equipment and cargo in the vehicle and trailer. 5. These maximum payload ratings are intended for comparison purposes only. Before you buy a vehicle or use it to haul people or cargo, carefully review the vehicle loading section of the Owner's Manual and check the carrying capacity of your specific vehicle on the label on the inside of the driver's door jamb. 6. Before you buy a vehicle or use it for trailering, carefully review the Trailering section of the Owner's Manual. The weight of passengers, cargo and options or accessories may reduce the amount you can tow. 7. Published dimension indicated is from ground and without optional equipment or accessories. Additional accessories or equipment ordered at the customer's request can result in a minor change in this dimension.

Amp hour rating	80 ah
Cold cranking amps	730 a

**NOTE:** If available, use the AGM setting when charging.

## PROPELLION SYSTEM

Drive Type	eAWD with performance torque vectoring
Motor - Permanent Magnetic Drive	2 motors

**NOTE:** Propulsion power may be reduced in extremely cold temperatures, or if the high voltage batter is too cold. The message BATTERY TO COLD, PLUG IN TO WARM will display. If the message displays, a Level 2 charger is required to heat the battery to a minimum temperature to enable propulsion or charging.

This vehicle is equipped with high voltage battery thermal detection, mitigation, and notification software. If the high voltage battery overheats, it may create a risk of a vehicle fire and may result in damage to property, serious injury, or death.

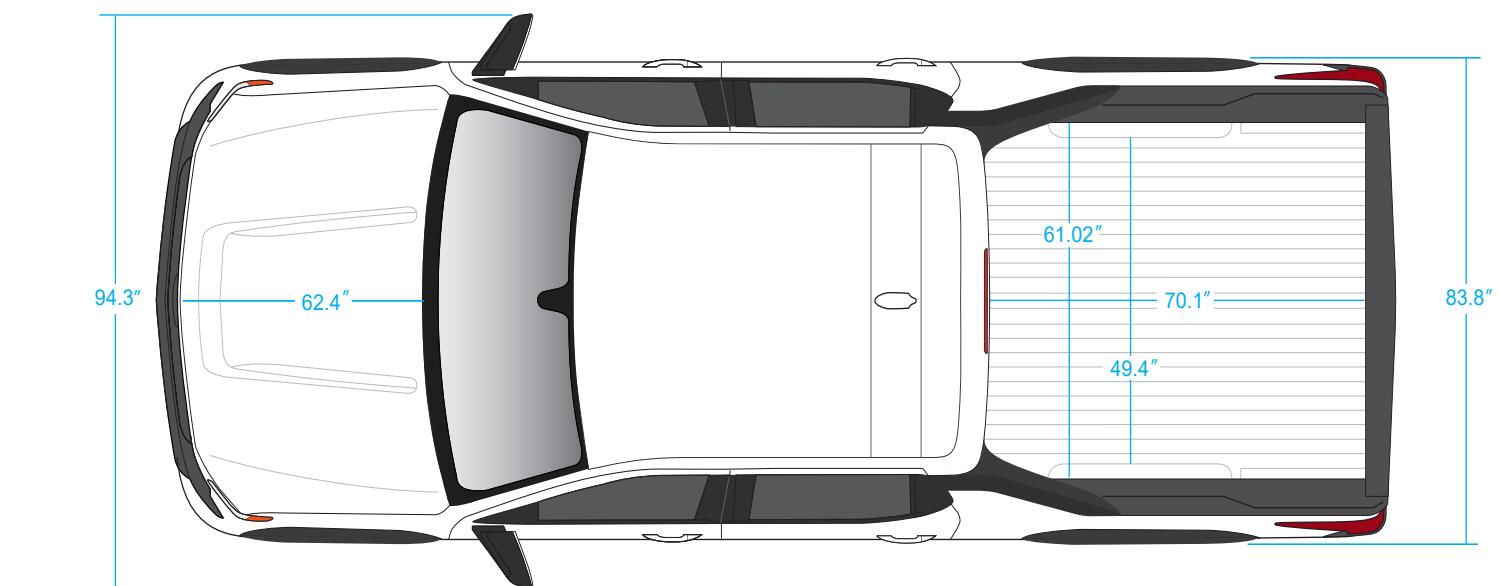

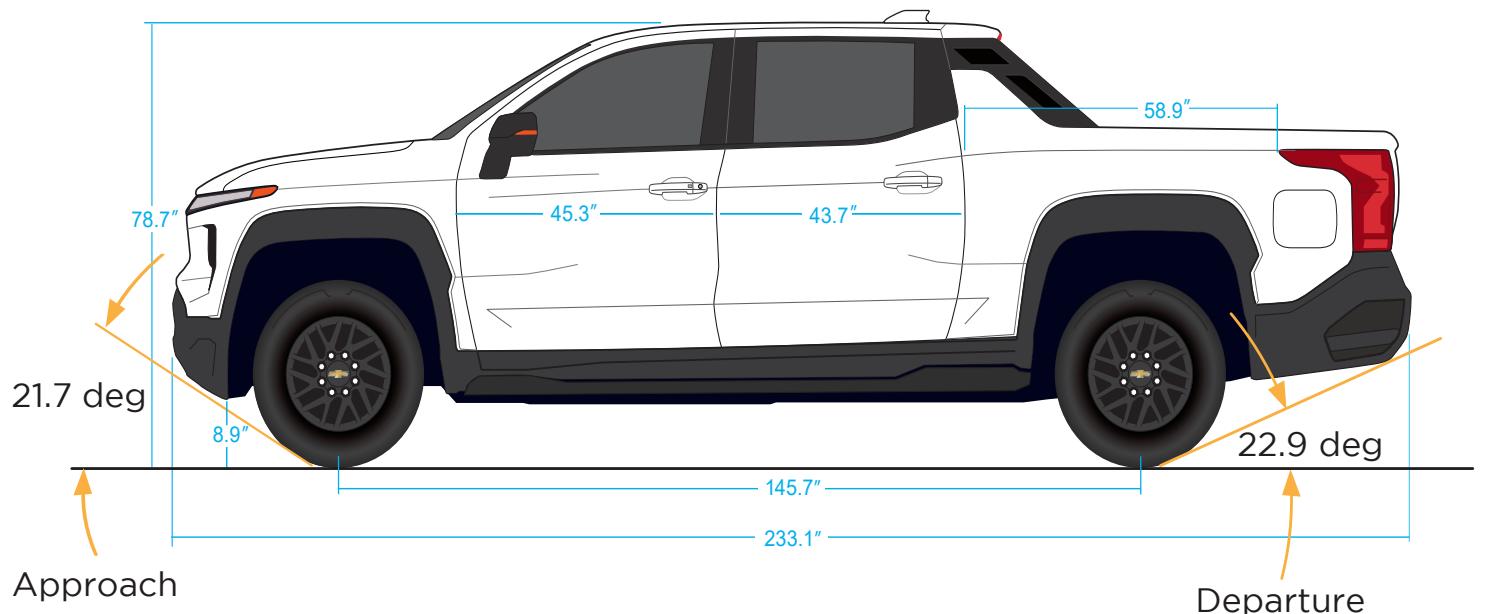

If the high voltage battery overheats, an audible alarm may sound, a message may display on the Driver Information Center (DIC), and OnStar may be called. To alert others outside your vehicle, the horn may sound, and the lights may flash.

**1.** Actual charge times will vary based on battery starting state of charge, battery condition, output of charger, vehicle settings and outside temperature. See owner's manual for additional limitations. **2.** With optional XKT Package which includes (K20) 19.2kW Charging Module. **3.** Limited warranty, 8Years /100,000 Miles, whichever comes first. See dealer for details. See owner's manual for additional limitations.

# UPFITTER POWER PROVISIONS

## UPFITTER POWER PROVISIONS

Upfitter power provisions can be obtained by installing a fuse kit in the primary battery mounted electrical center Battery Distribution Unit (BDU) and adding a fuse tap kit to the RH Interior Electrical Center (IEC). Updates to the BDU to enable the use of the fused battery power provisions for upfitters is recommended.. The kit (P/N 84669070) will enable the installation of the fuse as outlined in UI Bulletin #200.

12V Battery - LN4 AGM Battery. SAE 730 CC. 80 AH, 140 RC.

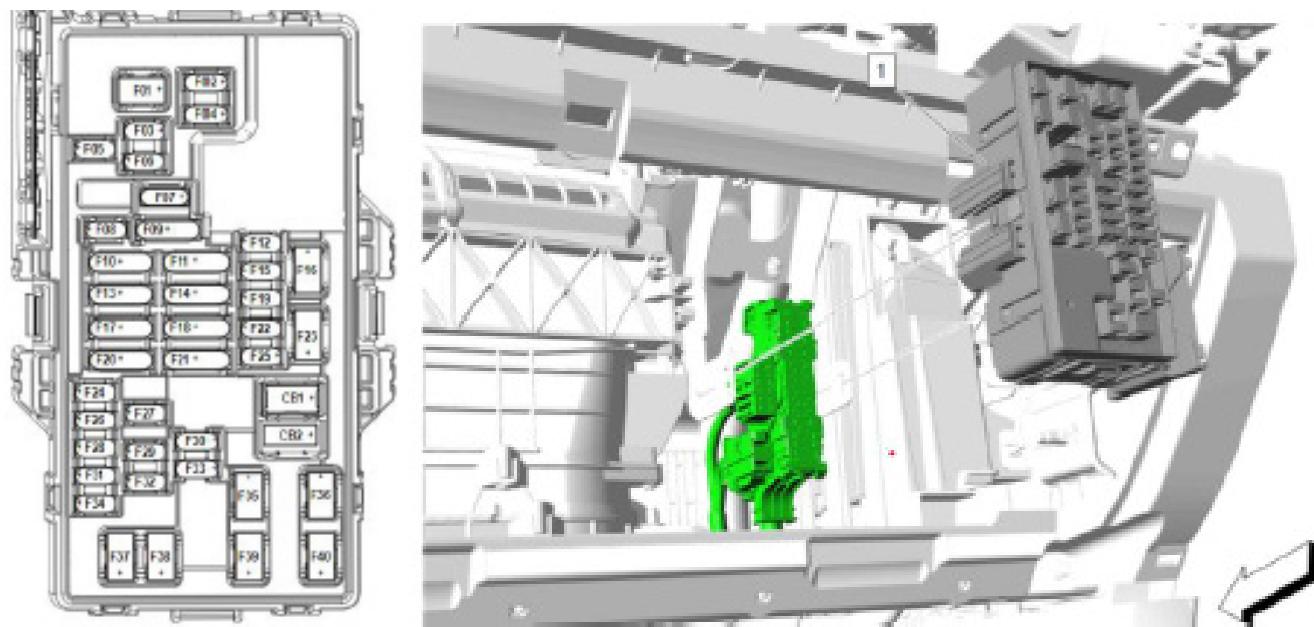

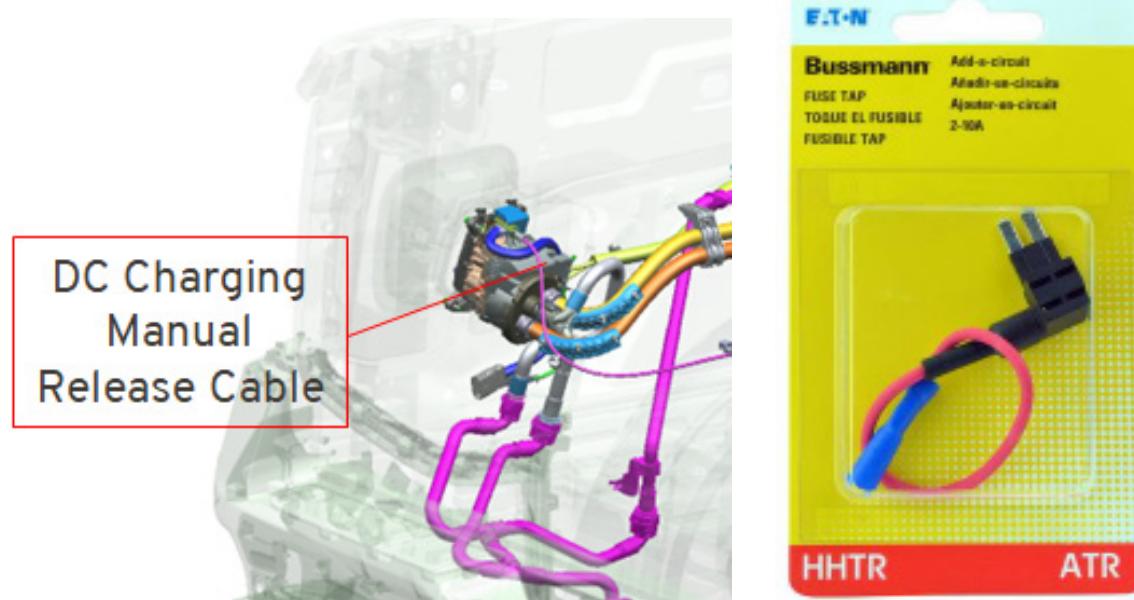

# UPFITTER POWER PROVISIONS

## IGNITION POWER PROVISIONS

As an interim solution for obtaining a RUN mode power source a terminated wire lead will need to add a fuse tap kit like the one shown below to the unused fuse location in the RH IP fuse block. This fuse tapper will be inserted into the empty F22DR slot shown in the top view of the fuse block. Once the fuse tap has been inserted install a 10a or smaller fuse into both open slots of the tap.

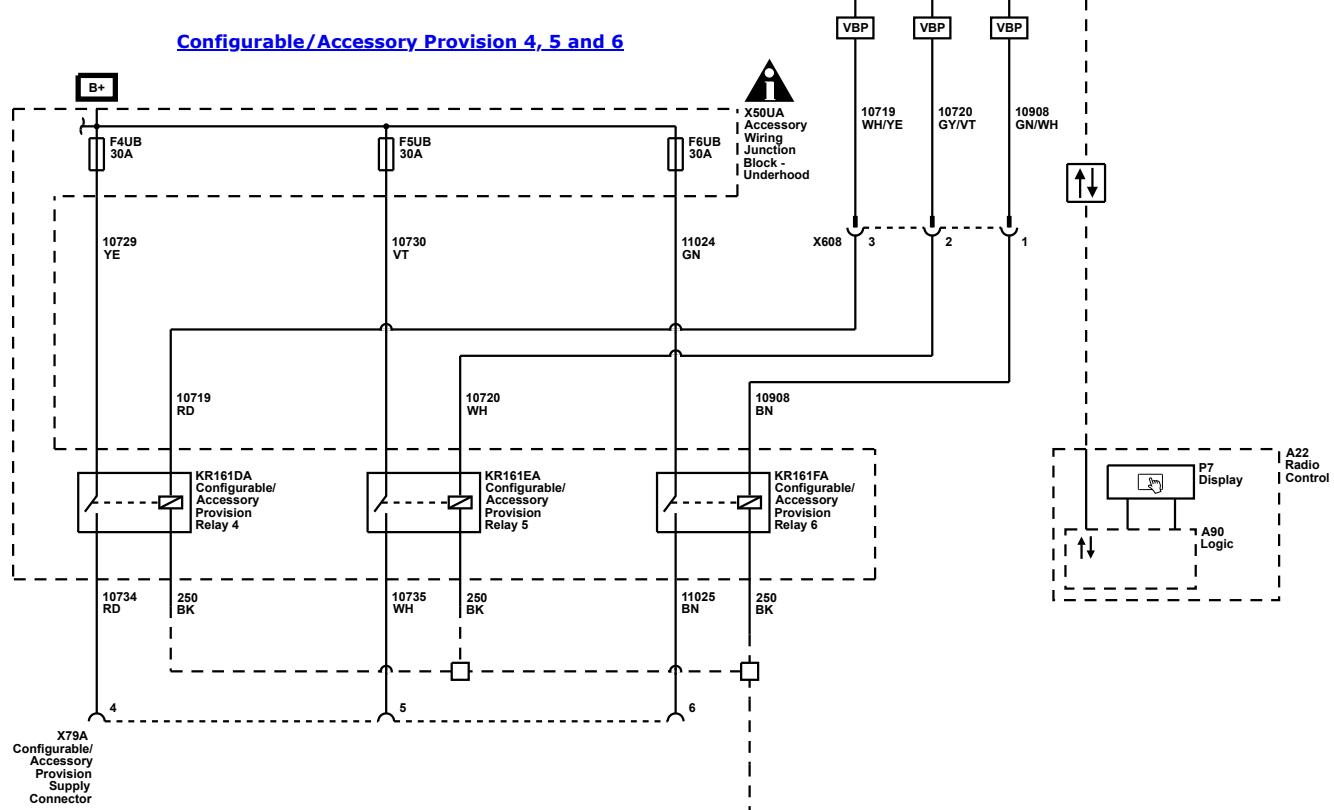

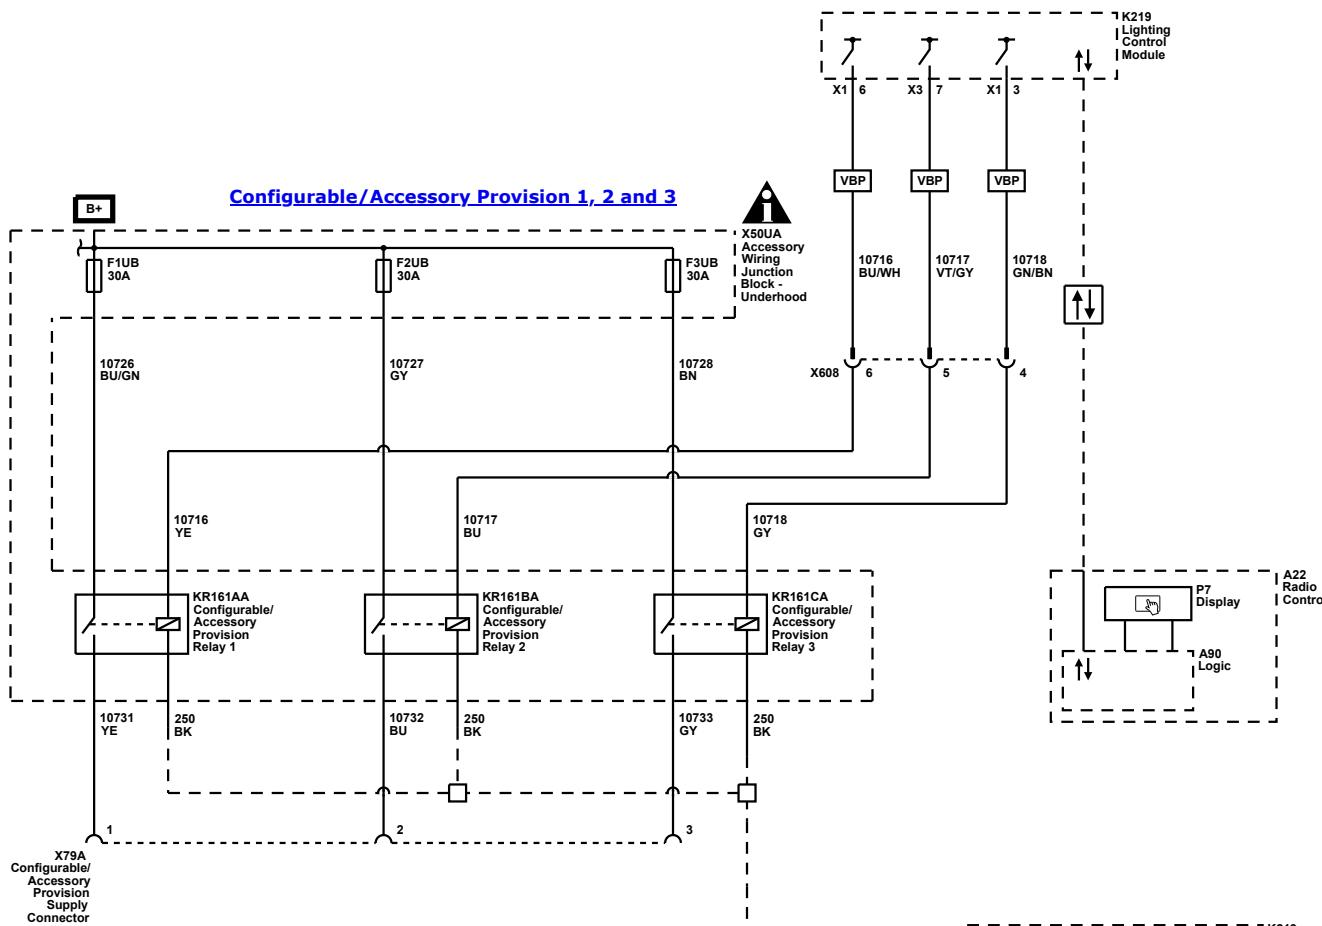

It is recommended that the crimp connector be removed and soldered connection with shrink tube to the pigtail wire.

See UI Bulletin #200 for detailed instructions.

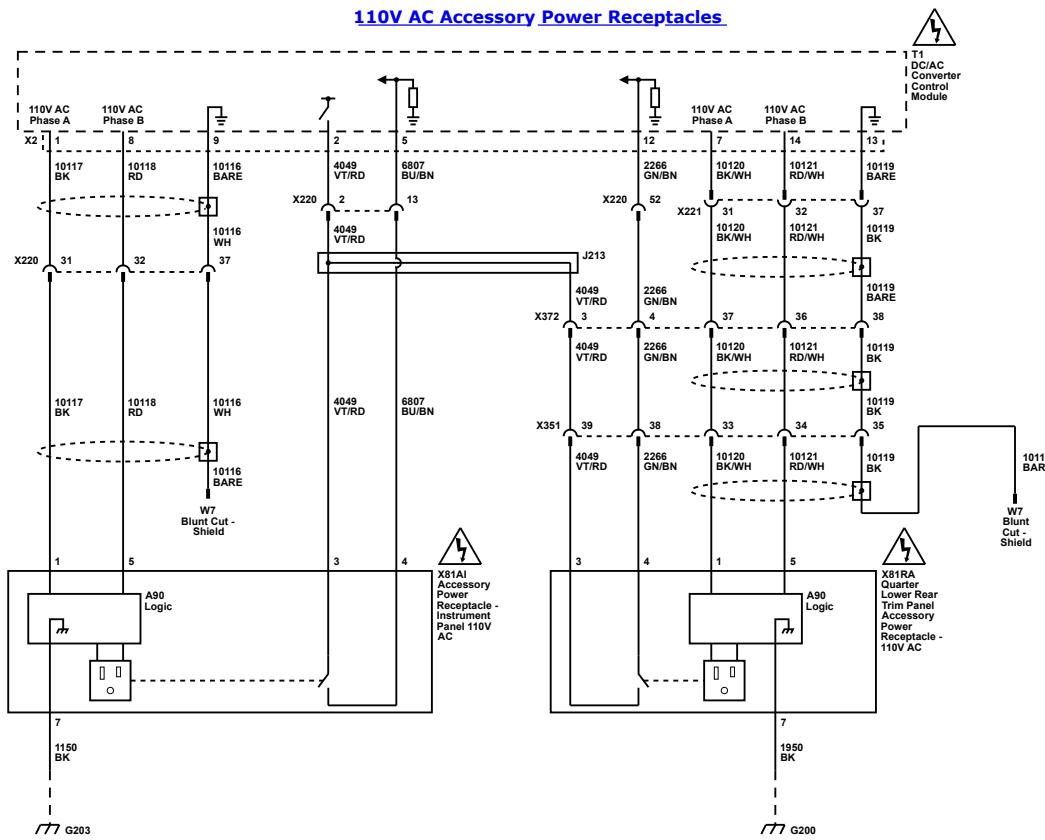

Fuse Block is located inside the RH IP glove compartment.

# AIRBAGS FAQ

**Q: Can equipment such as traffic warning, video cameras, and radio trees be mounted in a specialty vehicle equipped with a right front passenger frontal airbag?**

A: Yes, but care must be taken to properly mount the equipment outside of the airbag "deployment zone."

**Q: What is the airbag "deployment zone"?**

A: The term "deployment zone" describes the space an airbag takes up when fully inflated. Airbags need room to work properly, and anything in the "deployment zone" – such as improperly mounted equipment – can greatly affect the performance of the airbag.

**Q: How can I identify the airbag "deployment zone" in my vehicle?**

A: See Airbag Deployment Diagrams for more information. The diagrams provide the approximate dimensions of the "deployment zones" for your specialty vehicle. Before doing any service work, including the installation of any equipment, consult the appropriate service manual.

**Q: Is it possible to shield equipment so it does not interfere with airbag deployment?**

A: While shielding may protect certain equipment from being damaged or dislodged, it may also negatively affect how an airbag inflates. Therefore, we do not recommend the placement of any equipment in the deployment zone, even if shielded.

**Q: Can the installation of push bumpers on the front end of the vehicle affect the deployment of the airbag?**

A: It is not likely that installing push bumpers will affect deployment for the airbag as long as the vehicle structure itself is not modified. GM is not aware of any adverse defects effect on the deployment of the front airbags due to use of many aftermarket push bumpers installed on current GM police vehicles

See "Adding Equipment to the Airbag-Equipped Vehicle" in the owner manual for more information.

**Customer-Installed Equipment**

Before installing equipment, read the following.

Airbags inflate with great force, faster than the blink of an eye. No objects, such as shotguns, should be placed over or near the airbag covers. Equipment mounted too close to an inflating airbag could prevent the airbag from operating properly to protect the occupants or could be forced into an occupant or break and become a dangerous projectile, causing severe injury or even death. To help prevent injury and to allow the airbag to perform as it was designed, do not mount equipment inside the airbag deployment zones.

Do not attach anything to the steering wheel hub or mount any equipment within the deployment zone for the driver airbag.

Do not mount equipment on the passenger side of the instrument panel top pad deployment zone. Equipment should not be mounted on or around the passenger airbag opening because of a deploying airbag. To allow the airbag to perform as it was designed, do not mount equipment inside the airbag deployment zone.

Do not mount a security barrier such that the ends of the barrier or brackets are within the roof-rail airbag deployment zones.

Avoid installing wiring for roof-rail emergency lighting or radio antennas that may restrict the proper deployment of the roof-rail airbags.

GM approved service procedures must be followed to remove and reinstall the instrument panel to the pad to ensure proper airbag deployment.

The police vehicle has a rollover sensor mounted on the center-line of the vehicle between the driver and front outboard passenger positions. If the vehicle has individual front seats, the rollover sensor will be exposed. Do not mount equipment within 25 mm (1 in) of the rollover sensor. This may affect the performance of multiple restraint systems.

Always use seat belts and the correct restraint for your child's age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See the Owner's Manual and the child safety seat instructions for more safety information.

**1.** Includes first required maintenance visit as stated in vehicle maintenance schedule. Maintenance visit consists of oil change, tire rotation and Multi-Point Vehicle Inspection. Does not include air filters. See participating dealer for other restrictions and complete details. Excludes vehicles ordered with fleet delete option RY9.

**2.** Whichever comes first. See dealer for limited warranty details. **3.** Whichever comes first. A Qualified Fleet User is defined as a company that has purchased and registered or leased five (5) or more new cars/or trucks solely for use in its operation during the current or preceding calendar year, model year, preceding twelve (12) month period, or that owns or leases fifteen (15) or more cars and trucks. Excludes rental customers. See dealer for details. **4.** Tires also covered under the Bumper-to-Bumper limited warranty but are prorated based upon mileage. See dealer for limited warranty details. If the vehicle has a warrantable failure, see your Owner's Manual for full details on the Courtesy Transportation program. **5.** Customer maintenance item after 7,500 miles. **6.** Built to resist corrosion. Application of additional rust inhibiting materials is neither necessary nor required under the Sheet Metal Coverage. GM makes no recommendations concerning the usefulness or value of such products. Application of after manufacture rust proofing products may create an environment which reduces the corrosion resistance built into your vehicle. Repairs to correct damage caused by such applications are not covered under your New Vehicle Limited Warranty.
