CHEVROLET EQUINOX EV

Preproduction 2025 Chevrolet Equinox EV RS shown with optional equipment. Actual production model may vary.

This catalog is not updated during the model year and should not be used for ordering purposes. It is intended as a source of basic information. All illustrations and specifications in this literature are based on the latest product information available at the time of publication. General Motors reserves the right to make changes at any time without notice. For further details, consult your local dealer.

Care must be taken during customer installation of equipment and wiring to ensure that all holes drilled in the body are corrosion protected, properly sealed and that vehicle wiring harnesses, piping or other components have not been displaced or damaged. Aftermarket equipment installers must be mindful of applicable Federal Motor Vehicle Safety Standards. This information can be obtained directly from the National Highway Traffic Safety Administration. Adding non-dealer accessories or making modifications to the vehicle can affect vehicle performance, aerodynamics, and overall top speed. Please return all vehicles to factory condition and settings upon decommissioning to prevent civilians from using these new 2026 calibrations, lighting and other features intended only for and emergency customers. Wiring connection or splice changes are to be removed before the vehicle is returned to civilian use.

These vehicles are equipped with an airbag system. The airbag system in your vehicle includes frontal driver and front outboard passenger airbags, front seat back side impact airbags and roof rail mounted head-curtain airbags. Customer installed equipment such as security barriers behind the front seats should not be mounted so that the barrier ends are within the side airbag deployment zones. The sensors and other components for the airbag system must not be relocated to accommodate the installation of customer furnished equipment; please refer to the service manual for sensor and other component locations. For information concerning instrument panel top pad mounted equipment and airbag system deployment zones, see the airbag information section in this catalog and the vehicle owners manual.

A note about vehicle alterations by independent suppliers: This catalog shows pictures of vehicles that have been altered or upfitted with equipment or components supplied to Chevrolet or its dealers by independent suppliers. GM is not responsible for the safety or quality of design features, materials or workmanship of any alterations by third parties.

Some Eligible 24MY EVs will require a dealership or over-the-air update to enable bi-directional charging. Weather conditions, life of the battery, vehicle variation and usage, and other external factors may impact the duration of power supply. Power supply may be interrupted. It is not recommended that the following devices be powered with the GM Energy PowerSHIFT Charger and V2H Enablement Kit: Medical devices.

¹ Use Hitch Guidance only to help back the vehicle to a trailer hitch or, when traveling above 12 km/h (8 mph), to briefly check the status of your trailer. Do not use for any other purpose, such as making lane change decisions. Before making a lane change, always check the mirrors and glance over your shoulder. Improper use could result in serious in-jury to you or others.

STANDARD SAFETY AND DRIVER ASSISTANCE FEATURES

ADAPTIVE CRUISE CONTROL¹	Adaptive Cruise Control allows you to set a cruise control speed and automatically follow a detected vehicle ahead at a driver-selected following gap. If no vehicle is detected in your path, the feature works like regular cruise control. You can always override the feature and take control.
AIRBAGS²	Frontal, knee and seat-mounted side impact for driver and front passenger. Roof-rail mounted head-curtain for outboard seating positions. Includes front outboard Passenger Sensing System for front passenger.
BLIND ZONE STEERING ASSIST¹	Blind Zone Steering Assist can alert you and provide a brief, firm turn of the steering wheel when a potential crash is detected with a moving vehicle in the lane you're entering.
BUCKLE TO DRIVE²	Prevents vehicle from being shifted out of Park until driver seat belt is fastened; times out after 20 seconds and encourages seat belt use, can be turned on and off in Settings or Teen Driver menu.
ENHANCED AUTOMATIC EMERGENCY BRAKING¹	At speeds above 2mph, Enhanced Automatic Emergency Braking can help you avoid or reduce the severity of a collision with a collision with a detected vehicle you're following. Radar and camera technology are used to automatically provide hard emergency braking or enhance the driver's hard braking.
FOLLOWING DISTANCE INDICATOR¹	Following Distance Indicator displays the following time in seconds between your vehicle and a detected vehicle you're following to help you maintain a safe following distance.
FORWARD COLLISION ALERT¹	Forward Collision Alert can warn you if it detects a potential collision with a detected vehicle you're following so you can take action. It can also provide a tailgating alert if you're following a vehicle much too closely.
FRONT PEDESTRIAN AND BICYCLIST BRAKING¹	At speeds between 5 and 50 mph, Front Pedestrian and Bicyclist Braking can help you avoid or reduce the severity of a collision with a pedestrian or bicyclist it detects directly in front of you. It provides alerts and can automatically provide hard emergency braking or enhance the driver's hard braking. It has limited nighttime and low visibility performance.
HD SURROUND VISION CAMERA¹	With Trailer View Camera provision. HD Surround Vision provides selectable digital camera views of the area around your vehicle to help you park and avoid vehicles and objects. You can also display a guideline to show where our vehicle is heading. Standard on PDE and RS, Optional on PCY.
INTELLIBEAM¹	At speeds above 25 mph, IntelliBeam can automatically turn the vehicle's high beams on and off according to surrounding traffic conditions.
INTERSECTION AUTOMATIC EMERGENCY BRAKING¹	Intersection Automatic Emergency Braking can help you avoid or reduce the severity of an intersection collision with a detected cross-traffic vehicle. It provides alerts and can even automatically provide hard emergency braking or enhance the driver's hard braking.
ENHANCED LANE KEEP ASSIST WITH LANE DEPARTURE WARNING¹	Lane Keep Assist with Lane Departure Warning uses a brief steering wheel turn to alert you when it detects you are unintentionally drifting out of your lane lines. If needed, you may receive additional Lane Departure Warning alerts. System alerts do not occur if you're using your turn signal, or it detects you may be intentionally leaving
CHILD RESTRAINT SYSTEM²	ISOFIX/LATCH. Two point lower anchors and 2 upper tether points. For installing child restraints seats.
PASSENGER SENSING SYSTEM²	Passenger Sensing System, sensor indicator inflatable restraint, front passenger/child presence detector.
PEDESTRIAN SAFETY SIGNAL¹	Automated external sound generator at low speeds alerts pedestrians of vehicle presence.
REAR CROSS TRAFFIC BRAKING¹	When you're in Reverse, Rear Cross Traffic Braking alerts you and automatically provides hard emergency braking to help prevent a collision with detected vehicles crossing behind you.
REAR PARK ASSIST¹	When in Reverse, Rear Park Assist provides alerts of nearby detected vehicles and objects behind your vehicle to help you park and avoid collisions.
REAR PEDESTRIAN ALERT¹	When you're in Reverse, Rear Pedestrian Alert can alert you to detected pedestrians directly behind your vehicle. It has limited nighttime and low visibility performance. Standard on PDE and RS. Optional on PCY with (AS2) Active Safety Package 2.
REVERSE AUTOMATIC BRAKING¹	Reverse Automatic Braking alerts you and/or automatically provides hard emergency braking to help avoid collisions with detected vehicles and objects directly behind you when you're in Reverse.
SAFETY ALERT SEAT²	Safety Alert Seat uses left-, right- or both-side driver seat vibration pulses to help you detect and identify the direction of potential crashes. You can also switch to beeping crash avoidance alerts.
SEAT BELTS²	3-way for all positions. Front passenger presence detector. Rear passenger seat belt pretensioners and indicators.
SIDE BICYCLIST ALERT¹	Side Bicyclist Alert alerts you to a detected bicyclist that is approaching a side blind zone. Also, during a brief time after parking, the feature can alert you when a detected bicyclist is approaching so you don't open your door.
TEEN DRIVER²	A configurable feature that lets you activate customizable vehicle settings associated with a key fob. It can limit certain available vehicle features and prevents certain safety systems from being turned off. It can be turned off in the Infotainment System. An invoice report card gives you information on driving habits.
TRAFFIC SIGN RECOGNITION³	Traffic Sign Recognition can display detected speed limit signs in your instrument cluster. The feature can also be set to notify you when you may be speeding or a new sign is detected. Standard on RS. Standard and included with (AS2) Active Safety Package 2. Optional on PCY with Active Safety Package (AS2). For full functionality, requires an active, eligible OnStar plan.

1. Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings, road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle's owner's manual for more important feature limitations & information.

2. Always use seat belts and child restraints. Children are safer when properly secured in a rear seat in the appropriate child restraint. See the Owner's Manual for more information.

3. Connected vehicle services vary by vehicle model and require active service plan, working electrical system, cell reception and GPS signal. OnStar links to emergency services. See onstar.com for details and limitations.

NOTE: Propulsion power may be reduced in extremely cold temperatures, or if the high voltage batter is too cold. The message BATTERY TO COLD, PLUG IN TO WARM will display. If the message displays, a Level 2 charger is required to heat the battery to a minimum temperature to enable propulsion or charging.

NOTE: If available, use the AGM setting when charging.

This vehicle is equipped with high voltage battery thermal detection, mitigation, and notification software. If the high voltage battery overheats, it may create a risk of a vehicle fire and may result in damage to property, serious injury, or death.

If the high voltage battery overheats, an audible alarm may sound, a message may display on the Driver Information Center (DIC), and OnStar may be called. To alert others outside your vehicle, the horn may sound, and the lights may flash.

FEATURE HIGHLIGHTS

GM'S BATTERY PLATFORM ENERGY RECOVERY

The patented heat pump recovers energy from the battery to power heating and propulsion, while also conserving range — which may provide the Equinox EV with as much as 10% more range ¹. With its active heating capabilities, the Equinox EV can also potentially charge more efficiently by warming up the batteries before charging ².

¹ Actual range will vary based on several factors, including temperature, terrain, battery age, loading, use and maintenance.

² Actual charge times will vary based on battery starting state of charge, battery condition, output of charger, vehicle settings and outdoor temperature. See the vehicle's Owner's Manual for additional limitations.

³ Feature may be limited when the battery temperatures are extremely cold or hot or when battery is near full charge. Always use the brake pedal when you need to stop immediately. See the vehicle's Owner's Manual for details.

STANDARD ONE-PEDAL DRIVING ³

This feature slows the vehicle to a full stop, using only the accelerator pedal under most conditions.

AVAILABLE AUTONSENSE HANDS-FREE POWERLIFTGATE

Drivers can easily access the rear of the vehicle even with their hands full.

AutoSense liftgate opens when the key fob is within 3 feet of the liftgate for 3 seconds.

STANDARD REGEN ON DEMAND ^{TM 4}

This feature can convert the kinetic energy of the vehicle's forward momentum into electricity that's stored in the battery pack to help maximize driving range.

AIRBAGS FAQ

Q: Can equipment such as radar devices, video cameras, and radio trees be mounted in a specialty vehicle equipped with a right front passenger frontal airbag?

A: Yes, but care must be taken to properly mount the equipment outside of the airbag "deployment zone."

Q: What is the airbag "deployment zone"?

A: The term "deployment zone" describes the space an airbag takes up when fully inflated. Airbags need room to work properly, and anything in the "deployment zone" – such as improperly mounted equipment – can greatly affect the performance of the airbag.

Q: How can I identify the airbag "deployment zone" in my vehicle?

A: See Airbag Deployment Diagrams for more information. The diagrams provide the approximate dimensions of the "deployment zones" for your specialty vehicle. Before doing any service work, including the installation of any equipment, consult the appropriate service manual.

Q: Is it possible to shield equipment so it does not interfere with airbag deployment?

A: While shielding may protect certain equipment from being damaged or dislodged, it may also negatively affect how an airbag inflates. Therefore, we do not recommend the placement of any equipment in the deployment zone, even if shielded.

Q: Can the installation of push bumpers on the front end of the vehicle affect the deployment of the airbag?

A: It is not likely that installing push bumpers will affect deployment for the airbag as long as the vehicle structure itself is not modified. GM is not aware of any adverse defects effect on the deployment of the front airbags due to use of many aftermarket push bumpers installed on current GM police vehicles.

See "Adding Equipment to the Airbag-Equipped Vehicle" in the owner manual for more information.

Customer-Installed Equipment

Before installing equipment, read the following.

- Airbags inflate with great force, faster than the blink of an eye. No objects, such as shotguns, should be placed over or near the airbag covers. Equipment mounted too close to an inflating airbag could prevent the airbag from operating properly to protect the occupants or could be forced into an occupant or break and become a dangerous projectile, causing severe injury or even death. To help prevent injury and to allow the airbag to perform as it was designed, do not mount equipment inside the airbag deployment zones.
- Do not attach anything to the steering wheel hub or mount any equipment within the deployment zone for the driver airbag.
- Do not mount equipment on the passenger side of the instrument panel top pad deployment zone. Equipment should not be mounted on or around the passenger airbag opening because of a deploying airbag. To allow the airbag to perform as it was designed, do not mount equipment inside the airbag deployment zone.
- Do not mount a security barrier such that the ends of the barrier or brackets are within the roof-rail airbag deployment zones.
- Avoid installing wiring for roof-rail emergency lighting or radio antennas that may restrict the proper deployment of the roof-rail airbags.
- GM approved service procedures must be followed to remove and reinstall the instrument panel to the pad to ensure proper airbag deployment.
